 CHAPTER I	
Scope and Object of the Research	1-13
1.1. Choice of the main solvent used.....	3-5
1.2. Methods of Investigation.....	5-6
1.3. Summary of the work done.....	6-10
References.....	11-13
 CHAPTER II	
General Introduction	14-53
2.1. Thermodynamics of Ion-pair Formation.....	16-18
2.2. Viscosity.....	18-24
2.2.1. Division of B-coefficients into Ionic values.....	20-22
2.2.2. Thermodynamics of Viscous Flow.....	22-23
2.2.3. Effects of Shape and Size.....	23-24
2.3. Conductance.....	25-33
2.3.1. Ion-Association.....	26-27
2.3.2. Ion-Size Parameter and Ionic Association.....	27-29
2.3.3. Limiting Ionic Equivalent Conductances.....	29-31
2.3.4. Solvation Number.....	31-32
2.3.5. Stokes' Law and Walden's Rule.....	32-33
2.4. Apparent and Partial Molar Volumes.....	33-35
2.5. Ionic Limiting Partial Molar Volumes.....	35-36
2.6. Ultrasonic Sound Speeds.....	36
2.7. Apparent Molal Isentropic Compressibility.....	36-38
2.8. Some Recent Trends in Solvation Methods.....	38-39
2.9. Acoustic parameters.....	39-41
2.10. Excess Functions.....	41-44
2.10.1. Excess Molar volumes.....	42
2.10.2. Viscosity Deviations.....	42
2.10.3. Gibbs Excess Energy of Activation for Viscous Flow.....	42-43
2.10.4. Excess Isentropic Compressibility.....	43
2.10.5. Deviation of Sound Speeds.....	43
2.10.6. Excess Intermolecular Free Length and Excess Acoustic Impedance.....	44
2.11. Correlating Equations.....	44-45
References.....	46-53

CHAPTER III

Experimental Section.....		54-63
3.1. Chemical used – their Sources and Purifications.....	54-57	
3.2. Experimental Techniques.....	57-60	
3.2.1. Density Measurements.....	57	
3.2.2. Viscosity Measurements.....	57-58	
3.2.3. Conductance Measurements.....	58	
3.2.4. Ultrasonic Sound Speeds Measurements.....	59-60	
References.....	61-63	

CHAPTER IV

Study of Densities, Viscosities, and Ultrasonic Speeds of Binary Mixtures Containing 1, 2-Dimethoxyethane and Some Alkan-1-ol at 298.15 K.....		64-97
4.1. Introduction.....	64-65	
4.2. Experimental.....	65-66	
4.3. Results and Discussion.....	66-74	
References.....	75-77	
Graphical Representation.....	90-97	

CHAPTER V

Conductometric Study of Some Metal Halides in Glycerol + Water Mixtures.....		98-116
5.1. Introduction.....	98-99	
5.2. Experimental.....	99-100	
5.3. Results and Discussion.....	100-104	
References.....	105-106	
Graphical Representation.....	115-116	

CHAPTER VI

Study of Densities, Viscosity Deviations, and Isentropic Compressibilities of Ternary Liquid Mixtures of Water and Ethane-1, 2-diol with Some Monoalcohols at Various Temperatures.....		117-139
6.1. Introduction.....	117-118	
6.2. Experimental.....	118-119	
6.3. Results and Discussion.....	119-124	
References.....	125-127	
Graphical Representation.....	135-139	

CHAPTER VII

Physico-Chemical Studies on the Solute-Solvent Interactions and Ultrasonic Speed of Resorcinol in 2-Methoxyethanol and Tetrahydrofuran at Different Temperatures.....		140-158
7.1. Introduction.....	140-141	
7.2. Experimental.....	141-142	
7.3. Results and Discussion.....	142-146	
References.....	147-148	
Graphical Representation.....	154-158	

CHAPTER VIII

Electrical Conductance of Some Tetraalkylammonium and Alkali Metal Bromides and Sodium Tetraphenylborate in Ethane-1, 2-diol and Formamide at 298.15 K.....	159-174
8.1. Introduction.....	159-160
8.2. Experimental.....	160-161
8.3. Results and Discussion.....	162-165
References.....	166-167
Graphical Representation.....	173-174

CHAPTER IX

Thermodynamics and Transport Behavior of Non- Aqueous Binary Mixtures of Benzene with Carbontetrachloride and Chloroform at Different Temperatures.....	175-191
9.1. Introduction.....	175-176
9.2. Experimental.....	176
9.3. Results and Discussion.....	177-179
References.....	180
Graphical Representation.....	187-191

CHAPTER X

Studies on Ion-Solvent and Ion-Ion Interactions of Some Mineral Salts in Aqueous Binary Mixtures of Ethane-1, 2-diol by Volumetric, Viscometric and Ultrasonic Speed Measurements.....	192-216
10.1. Introduction.....	192-193
10.2. Experimental.....	193-194
10.3. Results and Discussion.....	195-199
References.....	200-201
Graphical Representation.....	214-216

CHAPTER XI

Concluding Remarks.....	217-221
--------------------------------	----------------
