

# Acknowledgements

*This work was carried out at **High Energy & Cosmic Ray Research Centre, University of North Bengal** with the financial assistance from the **University Grants Commission, India** under the Award No. F.17-88/98 (SA-1).*

*I would like to express my grateful thanks to:*

*My supervisor of this thesis— **Dr. Arunava Bhadra**, who give me an opportunity to make a way in research by accepting me as a Ph.D. student, for the continuous support of my Ph.D. study and related research with innovative ideas, for his patient guidance and motivation. I am inspired and gained confidence by his positive outlook and confidence in my research. I have been extremely lucky to have a supervisor who cared so much about my work and also planing of my future path.*

*My co-supervisor of this thesis— **Dr. Samir Kumar Sarkar**, for the constant support, guidance and insightful suggestions, which were help me a lot to accomplish the work presented in the thesis.*

*Colleague and co-member of our small “High Energy & Cosmic Ray Research Centre (HECRRC) group”— **Mr. Arindam Mukherjee** for his everyday help in work and life, wise advice and tolerance of me.*

*All present and former colleagues and visiting members of the HECRRC— **Dr. Subhranshu Ghosh, Dr. Biplab Bijay, Mr. Samrat Ghosh, Mr. Tamal Sarkar, Mr. Sadhan Paul** and all others, for their assistance and providing an excellent working atmosphere to me.*

*I would like to express my warmest thanks to **Dr. Partha Sarathi Joarder** of **Bose Institute**, who helped me to improve knowledge about “Solar Hydrodynamics” and his encouragement and **Prof. B.S. Acharya** of **TIFR** of who helped me to understand the observational gamma-ray astronomy.*

*I would like to give special thanks to my friends and family members who stand by me in my every ups and downs.*
