

## List of Tables

Table No.	Title	Page
3.1	Ward Number Selection Procedure	64-65
3.2	District-wise Distribution of Sampling Unit	68
3.3	Ward-wise distribution of total number of sampled households, number of family members in the sampled households	70
3.4	District-wise distribution of Total Number of Sampled Households, Number of Family Members in the Sampled Households	71
4.1	Profile of Municipal Corporation cities of West Bengal	92
4.2:	Population growth trends of Siliguri	96
4.3	Growth of Slums area in and around SMCA	98
4.4	District-wise distribution of Municipal Wards	100
4.5	Borough-wise distribution of Municipal Wards of SMCA	102
4.6	Demographic indicators of SMCA (2011)	103
4.7	Ward-wise distribution of Sample	107
4.8	District-wise and Gender- wise distribution of Sample	108
4.9	Religion-wise and Caste- wise distribution of Sample	109
4.10	Age -wise distribution of Sample	110
4.11	Education level –wise distribution of Sample	111
4.12	Marital Status –wise distribution of Sample	112
4.13	Occupation–wise distribution of Sample	113
4.14	Distribution of Sampled Households according to Major Source of Income	115
4.15	Monthly Income –wise distribution of Sampled Households	115
4.16	Economic Class -wise distribution of Sampled Households	116
4.17	Distribution of Sampled Households according to type of ownership of house, type of family, type of house, source of drinking water.....	117

<b>Table No.</b>	<b>Title</b>	<b>Page</b>
5.1	Distribution of Illness Episodes by Category of Disease and Place of Residence	121
5.2	Distribution of Incidence Rates and Prevalence Rates of disease by gender and place of residence	122
5.3	Distribution of Disabilities by Nature of Disability and Place of Residence	124
5.4	Distribution of Illness Episodes by Nature of disease and Place of Residence	125
5.5	Distribution of Illness Episodes by Severity and Place of Residence	126
5.6	Distribution of Category of diseases by Severity and Place of Residence	127
5.7	Distribution of Illness Episodes by Duration and Category of disease	128
5.8	Distribution of Morbidity Prevalence Rate by Category of diseases, Gender, Age and Education	130
5.9	Distribution of Morbidity Prevalence Rate by Category of disease, Caste, Religion, Marital status and Occupation	135
5.10	Distribution of Morbidity Prevalence Rate by economic characteristics of the household	138
6.1	Distribution of Illness Episodes by utilisation and non-utilisation of Healthcare Services	142
6.2	Distribution of Illness Episodes by Nature of utilisation of Healthcare	144
6.3	Distribution of Utilisation rate, Hospitalisation and Non-Hospitalisation rate	145
6.4	Distribution of Illness Episodes by Number of Visit to the Healthcare Facilities	147
6.5	Distribution of Illness Episodes with utilisation or non-utilisation of Healthcare Services by Gender, Age and Education of the sick people of SMCA	148
6.6	Distribution of Illness Episodes with utilisation or non-utilisation of Healthcare Services by Caste, Religion and Marital status of the sick people of SMCA	151-152

<b>Table No.</b>	<b>Title</b>	<b>Page</b>
6.7	Distribution of Illness Episodes with utilisation and non-utilisation of Healthcare Services by major source of household income, Monthly Household Income, Economic Class and Household size of the sick people of SMCA	154-155
6.8	Distribution of Illness Episodes by Category of disease and Utilisation Pattern of the sick people of SMCA	158-159
6.9	Distribution of Illness Episodes by Nature of disease and Utilisation Pattern of the sick people of SMCA	161
6.10	Distribution of Illness Episodes by Severity of disease and Utilisation Pattern of the sick people of SMCA	163-164
6.11	Distribution of different components of OOPHE	167
6.12	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Gender of the sick people of SMCA	169
6.13	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Age level of the sick people of SMCA	170
6.14	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Family Size of the sick people of SMCA	171
6.15	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Marital Status of the sick people of SMCA	173
6.16	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Monthly Households Income of the sick people of SMCA	174
6.17	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Major Source of Household Income of the sick people of SMCA	175
6.18	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Category of disease of the people of SMCA	176
6.19	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Severity of disease of the people of SMCA	177

<b>Table No.</b>	<b>Title</b>	<b>Page</b>
6.20	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Number of Days of Suffering of the people of SMCA	178
6.21	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Nature of disease of the people of SMCA	179
6.22	Distribution of average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Pattern of utilisation	180
6.23	Distribution of Average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by System of medicine utilised by the people of SMCA	182
6.24	Distribution of Average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Source of healthcare facilities utilised by the people of SMCA	183
6.25	Distribution of Average annual OOPHE and percentage of healthcare expenditure to the total OOPHE by Nature of utilisation of the people of SMCA	185
7.1	Log odds and Odds ratios of utilising all types of healthcare facilities: Results of binary multivariate logistic regression analysis	190-191
7.2	Log odds and Odds ratios of utilising modern healthcare facilities in contrast to traditional pattern of healthcare services: Results of binary multivariate logistic regression analysis	193-194
7.3	Log odds and Odds ratios of utilising IPD services in contrast to OPD services: Results of binary multivariate logistic regression analysis	195
7.4	Log odds and Odds ratios of utilising Allopathy and Ayurveda system of medicine: Results of Multinomial logistic regression analysis	196-197
7.5	Log odds and Odds ratios of utilising public and private healthcare sources: Results of Multinomial logistic regression analysis	197-198
7.6	Description of the Explanatory Variables	200-201
7.7	Parameter estimates of Log-linear multivariate regression model	202-203
